**(U) District of Columbia – FBI Finds Little Evidence US Capitol Attack was Coordinated**

(U) Washington – The FBI has found scant evidence that the 6 January attack on the US Capitol was the result of an organized plot to overturn the presidential election result, according to four current and former law enforcement officials. Though federal officials have arrested more than 570 alleged participants, the FBI at this point believes the violence was not centrally coordinated by far-right groups or prominent supporters of then-President Donald Trump, according to the sources, who have been either directly involved in or briefed regularly on the wide-ranging investigations. "Ninety to ninety-five percent of these are one-off cases," said a former senior law enforcement official with knowledge of the investigation. "Then you have five percent, maybe, of these militia groups that were more closely organized. But there was no grand scheme with Roger Stone and Alex Jones and all of these people to storm the Capitol and take hostages."
